.folding directions.

The first few times you fold your *Bumble Cover*, it may seem difficult. However, once you've done it a few times, it becomes very easy!

1. Lay your *Bumble Cover* with the colored side facing the floor and the bottom of the cover towards you.
2. Take the lower right corner and fold horizontally (making a vertical fold) into 1/3 of the cover, stopping when the magnets join together.
3. Take the lower left corner and fold horizontally to the lower right edge, attaching the magnets again. You should now have a 3-layer vertical strip that's approximately 12 inches wide and 25" high.
4. Turn the cover over so the large outer pocket is now facing up. Make sure the outer pocket is now at the top and the straps are closest to you.
5. Lay the straps on top of the cover.
6. Fold the top 1/3 of the cover down until the edge reaches the top of the large pocket.
7. Fold the next 1/3 of the cover *into* the large pocket making sure the grosgrain ribbon stays out of the pocket. You now have a rectangular shaped box with ribbon attached to the top of it.
8. Tie the ribbon in a bow or knot, fill the outside pockets with your items, and you're ready to go!

If you are going to be using the inside lined pocket(s) to hold the travel wipes and diapers, you will need to insert those into the pockets before starting Step 1.

If you are going to roll your cover for your diaper bag, you can do this 2 ways. Follow all 8 steps above and then do the following:

1. Remove the long skinny strap from the smaller outer pocket. This strap has a square magnet at either end and is sewn in the middle to the large outer pocket.
2. Start at the bottom of the folded cover and roll towards the top, making sure to keep the strap out of the roll. You don't need to roll it too tight for the straps to fit around it.
3. Once rolled, fasten the strap around your cover to keep it secure!

--OR--

Stop after Step 3 of the folding directions above and start rolling from the top towards the bottom. Fasten the strap around your cover to keep it secure!
